

Form 1 & 2 - Catch the Drop

On Tuesday the 29th October Form 1 and 2 students had the Catch the Drop Water Forum Theatre. This was a memorable experience for them all as it was not the usual talk about water conservation; it was a FUN-tastic experience since they had the possibility to interact in the drama play performed by 2 Curtain Raiser members. Students liked the fact they were involved in what was happening on stage and that they had enough time to participate in the group activities prepared for them; students also liked the idea of the teachers' involvement. It was an interactive and a holistic experience too since, indirectly, other topics such as planning, communication and sharing between mates were also discussed.
