

## Children's Day whole school

Children's Day this year was celebrated on the 28th of January 2014 at the Malta National Aquarium. All the students and staff spent the morning at the Aquarium appreciating some specimen of fish that inhabit our waters as well as other species that live outside the Mediterranean waters. The Malta National Aquarium is home to over a hundred different species of fish including sharks, rays, seahorses and eels. Needless to say the girls exclaimed excitedly when they spotted a favourite fish.
