

GRADE 6 GREEN TALK

On October 7th, the Grade 6 class had a visit from one of the members of the Dinja Waħda where a Green Talk was delivered.

It was a very interesting talk where the students were encouraged to discuss and participate throughout. During the talk the girls were taught the difference between a Nature Reserve and a Natura 2000 site. They were also encouraged to recognise Maltese indigenous flora and fauna. In fact photos of the Song Thrush, the Red Admiral and the Carrob tree where shown. Thereafter the speaker highlighted different tips in order to recognize such flora and fauna in our countryside. It was suggested that taking photos of our countryside can turn to be a very interesting hobby and the girls were motivated by the idea of venturing into such an activity. Perhaps, the photos taken by our *school photographers* could be hanged around the school – thus, whilst improving our school's environment the students could continue building their knowledge and understanding.
