

Senior 2 Robotics Competition

On Monday 3rd February 2014, three form 2 girls accompanied by Ms Betts attended a Robotics Programming Session at Bighi Science Centre, Kalkara. To start off, we had a talk highlighting the use of Robots in our daily lives. We were introduced to the basics of Robotics. All participants were given a Lego Mindstorms NX Robot along with a laptop to be able to programme the robot to carry out two tasks. To finish off the session, we presented our programmed robot to the rest of the competitors. It was truly an interesting experience!
