

## Tablets Pilot Project in Grade 3

On October 13th 2014 our Grade 3's started using the tablets as part of their lessons. Here they are seen during a writing lesson, using an application for their pre-writing activities. The student's task was to draw and label birthday party items in preparation of writing an e-mail –describing their birthday party to a friend. Other tasks that the girls have been doing are using Maths interactive activities to learn doubles, and number sequence as well as contributing to an ideas map using another application online and reading from interactive e-books online at home.

October 13th - 17th 2014
