

Upgrade of the IT Lab

September - 29th - 3rd Oct

One of the first projects initiated by the school during the first weeks of this year was the upgrading of the Information Technology Lab. During summer, Mr Kenneth Vella, headmaster, together with the IT technician Mr Karsten Stafrace met representatives of a number of established software companies and discussed with these the upgrade of the lab. These meetings led to the purchase and installation of a number of new LED monitors in the lab. These monitors are being used daily by the girls during different lessons.
