

Water Conservation Seminar – for Form 1 and 2

These are the photos took at the water conservation seminar for Form 1 and 2 held on the 15th of January 2014. The seminar, organized by HSBC, was a very interactive one where the students had the time to intervene and ask questions at their convenience, whilst being continuously involved in quizzes and experiments! A really fruitful experience that linked very well with the syllabi of Science and Geography.
